Subject: Land for sale

Good Morning Mr. Brown,

It's another beautiful day her in Boulevard. The only sounds I can hear today are the sounds of nature and the noisy wind Generators.

I have a friend that has a home here in Boulevard. He is a farmer in the Imperial Valley and has 1100 acres next to the power lines out by Mt Signal in the Imperial Valley. Ron Said he will sell the 1100 acres to Soitec. if that would keep you out of Boulevard.

I've been told you have a power agreement with S.D.G.E. in Imperial Valley. The Valley wants you and they have the Billion gallons of water you need for your project. We do not have that kind of water here. You will not need to waist your money on a noisy batch plant or a rock crusher that you will have to have here in Boulevard. The cost to build here in Boulevard has to be double to that of Imperial Valley. They have IVC that is teaching Solar to the residents of Imperial Valley. They hold job fairs a couple times a year. I know at the meeting you said your not giving back to the residents her in Boulevard so give back to Imperial Valley. First Solar gave back money to the school district as well as imperial County Fire.

Move your operation to the Valley

Wayne
